

Installation Manual

IX Series

Networked Video Intercom System

**IX-DV, IX-DVF, IX-DVF-P, IX-DVF-2RA, IX-DVF-RA, IX-DVF-L,
IX-SSA, IX-SSA-2RA, IX-SSA-RA**

Introduction

- Read this manual before installation and connection. Read the "Setting Manual" and "Operation Manual". The manuals can be downloaded from our homepage at "<https://www.aiphone.net/product/support/>" free of charge. (The manuals will be available from 9 November 2018 onwards.)
- After completing installation and connection, program the system according to the "Setting Manual". The system cannot operate unless it is programmed.
- After performing installation, review with the customer how to operate system. Leave documentation accompanying the Master Station with the customer.

- Perform installation and connection only after gaining sufficient understanding of the system and this manual.
- The illustrations used in this manual may differ from the actual stations.

Literature information

The important information concerning correct operation and what you should observe is marked with the following symbols.

 Warning	This symbol means that operating the device incorrectly or ignoring these precautions may cause severe injury or death.
 Caution	This symbol means that operating the device incorrectly or ignoring these precautions may cause severe injury or property damage.
	This symbol is intended to alert the user to prohibited actions.
	This symbol is intended to alert the user to important instructions.

Precautions

Warning

Negligence could result in death or serious injury.

Do not disassemble or modify the device.
May cause fire or electrical shock.

Do not use with a power supply voltage above the specified voltage.
May cause fire or electrical shock.

Do not install two power supplies in parallel to single input.
Fire or damage to the unit could result.

Do not connect any terminal on the unit to AC power line.
Fire or electric shock could result.

For power supply, use Aiphone power supply model specified for use with system.
If non-specified product is used, fire or malfunction could result.

Do not, under any circumstances, open up the device.
Voltage within some internal components may cause electrical shock.

The device is not designed to explosion-proof specifications. Do not install or use in an oxygen room or other such locations filled with volatile gases.
May cause fire or explosion.

Caution

Negligence could result in injury to people or damage to property.

Do not install or connect the device with the power on.
May cause electrical shock or malfunction.

Do not turn on power without first checking to make sure the wiring is correct and there are no improperly terminated wires.
May cause fire or electrical shock.

Do not put your ear close to the speaker when using the device.
May cause harm to the ear if a sudden loud noise is emitted.

General Precautions

- Install low-voltage lines at least 30cm (11") away from high-voltage lines (AC100V, 200V), especially inverter air conditioner wiring. Failure to do so may result in interference or malfunction.
- When installing or using the device, give consideration to the privacy rights of subjects, as it is the responsibility of the system owner to post signs or warnings in accordance with local ordinances.

Notice

- If the device is used in areas where there are business-use wireless devices such as a transceiver or mobile phones, it may cause malfunction.
- If the device is installed close to a light dimmer, an inverter electrical appliance or the remote control unit of a hot-water system or floor-heating system, it may create interference and cause a malfunction.
- If the device is installed in an area with an extremely strong electrical field, such as in the vicinity of a broadcasting station, it may create interference and cause a malfunction.
- If warm air from inside the room enters the unit, the internal and external temperature difference may cause condensation on the camera. Plugging of cable holes and other gaps where warm air might enter is recommended for preventing condensation.

Precautions for mounting

- Installing the device in locations or positions such as the following may affect the clarity of the image:
 - Where lights will be shining directly into the camera at night time
 - Where the sky fills much of the background
 - Where the background of the subject is white
 - Where sunlight or other strong light sources will shine directly into the camera

Where the sky fills much of the background

Where the background of the subject is white

Where sunlight or other strong light sources will shine directly into the camera

- In 50Hz regions, if a strong fluorescent light shines directly into the camera, it may cause the image to flicker. Either shield the camera from the light or use an inverter fluorescent light.
- Installing the device in the following locations could cause malfunction:
 - **Locations that get hot**
Close to a heater, boiler, etc.
 - **Locations where there is risk of exposure to liquid, dust, oil, or chemicals**
 - **Locations with high humidity**
Bathroom, basement, greenhouse, etc.
 - **Locations with low temperature**
Inside a cold storage warehouse, the front of a cooler, etc.
 - **Locations directly exposed to steam or oil smoke**
Next to heating devices or a cooking space, etc.
 - **Sulphurous environments such as a hot spring area**
 - **Locations close to the sea or directly exposed to sea breeze**
- If existing wiring is used, the device may not operate properly. In that case, it will be necessary to replace the wiring.
- Do not, under any circumstances, use an impact driver to fasten screws. Doing so may cause damage to the device.

Example of System Configuration

Part Names and Accessories

■ Part Names

IX-DVF-2RA

IX-DVF-RA

IX-DVF-P

IX-DVF-L

IX-SSA-2RA

IX-SSA-RA

■ Included accessories

● IX-DV

	Anchors x 4 	Wall-mounting screws x 4 	Special screwdriver x 1 	
	Installation Manual (this manual) 	Notice (IX Manuals and Software) x 1 	Option connectors (6pin x 1, 7pin x 1, 8pin x 1) 	
	Ferrite cores x 2 			

● IX-DVF, IX-DVF-P, IX-DVF-2RA, IX-DVF-RA, IX-DVF-L, IX-SSA, IX-SSA-2RA, IX-SSA-RA

	Back box x 1 	Special screws x 4 	Special screwdriver x 1 	
	Installation Manual (this manual) 	Notice (IX Manuals and Software) x 1 	Option connectors (6pin x 1, 7pin x 1, 8pin x 1) 	
	Ferrite cores x 2 	Transparent name plates x 2 (IX-DVF-L only) 		

Status Indicator

Refer to "Operation Manual" for additional indicators not listed.

 : Lit : Off

Status (Pattern)		Meaning
Orange flashing	Normal flashing 	Booting
	Rapid flashing 	Device error
	Long interval flashing 	Communication failure
	Long irregular flashing 	Firmware version updating
	Long irregular flashing 	Mounting micro SD card, unmounting micro SD card
	Long irregular flashing 	Initializing
Blue light		Standby

How to Install

■ Video Door Station Installation

● IX-DV (surface mount)

1

Loosen the screw with the special screwdriver, and remove the front cover.

Loosen
Special screwdriver (included)

4

Fasten the unit to the mounting surface.
* Use anchors or concrete plugs as needed.

Unit
Anchors (included) ×4
Low-voltage lines
Cat-5e/6 cable
Option connectors (included)
Wall-mounting screws (included) ×4

2

Open the terminal cover, and join the option connectors (included) to the low-voltage lines, and insert the option connectors and Cat-5e/6 cable to the unit.

Option connectors
Cat-5e/6 cable

3

Clamp the ferrite cores to Cat-5e/6 cables.

Open the ferrite core.
Thread Cat-5e/6 cable through the ferrite core.

Option connectors
Ferrite cores (included) ×2
Cat-5e/6 cable

5

Attach the front cover to the unit by hanging the upper 2 clips on the unit.
* Tighten the screw with the cover pressed to the wall.

Tighten

NOTE
Make room for threading a screw.

Screw mounting hole ×4
Unit center
Ø 6 mm (Ø 1/4")
35 mm (1-3/8")
182.6 mm (7-3/16")
95 mm (3-3/4")
Recommended Mounting height 1,500 mm (4' 11") (max. 1,850mm (6' 3/4"))
30 mm (1-3/16")
86.4 mm (3-3/8")
60 mm (2-3/8")

! Be sure to close the terminal cover when done. If left open, condensation or water may enter, preventing heat dissipation and causing damage.

● IX-DVF, IX-DVF-P, IX-DVF-2RA, IX-DVF-RA, IX-DVF-L, IX-SSA, IX-SSA-2RA, IX-SSA-RA (flush mount)

! When installing the unit on a rough surface, please use sealant to seal the unit edges to prevent water entering the unit. If the unit edges are left unsealed on a rough surface, IP65 ingress protection rating is not guaranteed.

2

Open the terminal cover, and join the option connectors (included) to the low-voltage lines, and insert the option connectors and Cat-5e/6 cable to the unit.

(1) Slide the terminal cover down.
 (2) Open up the terminal cover.
 (3) Insert the option connectors and Cat-5e/6 cable to the unit, and replace the terminal cover.

! Be sure to close the terminal cover when done. If left open, condensation or water may enter, preventing heat dissipation and causing damage.

Option connectors
 Cat-5e/6 cable

3

Clamp the ferrite cores to Cat-5e/6 cables.

Open the ferrite core. Thread Cat-5e/6 cable through the ferrite core.

Option connectors
 Ferrite cores (included) × 2
 Cat-5e/6 cable

e.g.) IX-DVF-L

1

Install the back box in the wall.

* For IX-DVF and IX-SSA: 120 mm (4-3/4")
 ** For IX-DVF and IX-SSA: 235 mm (9-1/4")

Back box (included)

148 mm * (5-13/16")

267 mm ** (10-1/2")

60 mm (2-3/8")

Low-voltage lines

Transparent name plate (included in IX-DVF-L only)

Recommended Mounting height (box center)
 1,500 mm (4'11")
 (max. 1,850mm (6' 3/4"))

Wall

Back box

Min. 5 mm (3/16")

The back box must be installed at a depth of at least 5 mm (3/16") from the wall face.

Option connectors (included)

Vandal-resistant front panel with the unit attached

Special screws (included) × 4

Special screwdriver (included)

Loosen

Tighten

5

Fasten the front panel to the back box with the special screws.

4

Insert the transparent name plate. (IX-DVF-L only)

(1) Peel off the protective plastic on the plate (both sides).

(2) Fill in the name on the transparent name plate.
 · Be sure to leave 25 mm (1") of white space on the right end to account for insertion.

(3) Insert the filled-in transparent name plate at the specified insertion opening (indicated with arrow to the right).

To insertion opening

To insertion opening

2 mm (1/8")

25 mm (1")

ABCDEF G

■ Camera View Area and Mounting Location (IX-DV, IX-DVF, IX-DVF-P, IX-DVF-2RA, IX-DVF-RA, IX-DVF-L)

● Camera view adjustment

Using the camera angle adjustment lever, the camera can be tilted up or down (-8°, 0°, +13°). Adjust the camera to the optimal position.

● Camera view range

The camera range as illustrated is only an approximate indication and may vary according to the environment.

IX-DV, IX-DVF

Vertical

All dimensions are approximate.

Horizontal

IX-DVF-P, IX-DVF-2RA, IX-DVF-RA, IX-DVF-L

Vertical

All dimensions are approximate.

Horizontal

When light enters the camera, the monitor screen may flicker brightly or the subject may become dark. Try to prevent strong lighting from entering the camera directly.

How to Connect

■ Connection Precautions

● Cat-5e/6 cable

- For connection between devices, use a straight-through cable.
- If necessary, when bending the cable, please observe the manufacturer's recommendations. Failure to do so could cause a communication failure.
- Do not strip away the cable insulation any more than is necessary.
- Perform termination in accordance with TIA/EIA-568A or 568B.
- Before connecting the cable, be sure to verify conduction using a LAN checker or similar tool.
- A RJ45 covered connector cannot be connected to the LAN ports of the master stations or the door stations. Use cables without covers on the connectors.

- Be careful not to pull on the cable or subject it to excessive stress.

● Precautions regarding low-voltage line

- Use PE (polyethylene)-insulated PVC jacketed cable. Parallel or jacketed conductors, mid-capacitance, nonshielded cable is recommended.
- Never use twisted-pair cable or coaxial cable.
- 2Pr quad V twisted pair cables cannot be used.

Parallel cable

Coaxial cable

- When connecting low-voltage lines, perform the connection using either the crimp sleeve method or soldering, then insulate the connection with electrical tape.

● Crimp sleeve method

1. Line up the solid wire and stranded wire and crimp them together.
2. Overlap the tape by at least a half width and wrap the connection at least twice.

● Soldering method

1. Twist the stranded wire around the solid wire at least 3 times.
2. After bending down the point, perform soldering, with care that no wires protrude from the soldering.
3. Overlap the tape by at least a half width and wrap the connection at least twice.

- If the connector-attached lead wire is too short, extend the lead with an intermediate connection.
- As the connector has polarity, perform the connection correctly. If the polarity is incorrect, the device will not operate.
- When using the crimp sleeve method, if the end of the connector-attached lead wire has been soldered, first cut off the soldered part and then perform crimp.
- **After completing connection of wires, check that there are no breaks or inadequate connections. When connecting low-voltage lines in particular, perform the connection using either soldering or the crimp sleeve method and then insulate the connection with electrical tape. For optimal performance, keep the number of wiring connections to a minimum.**

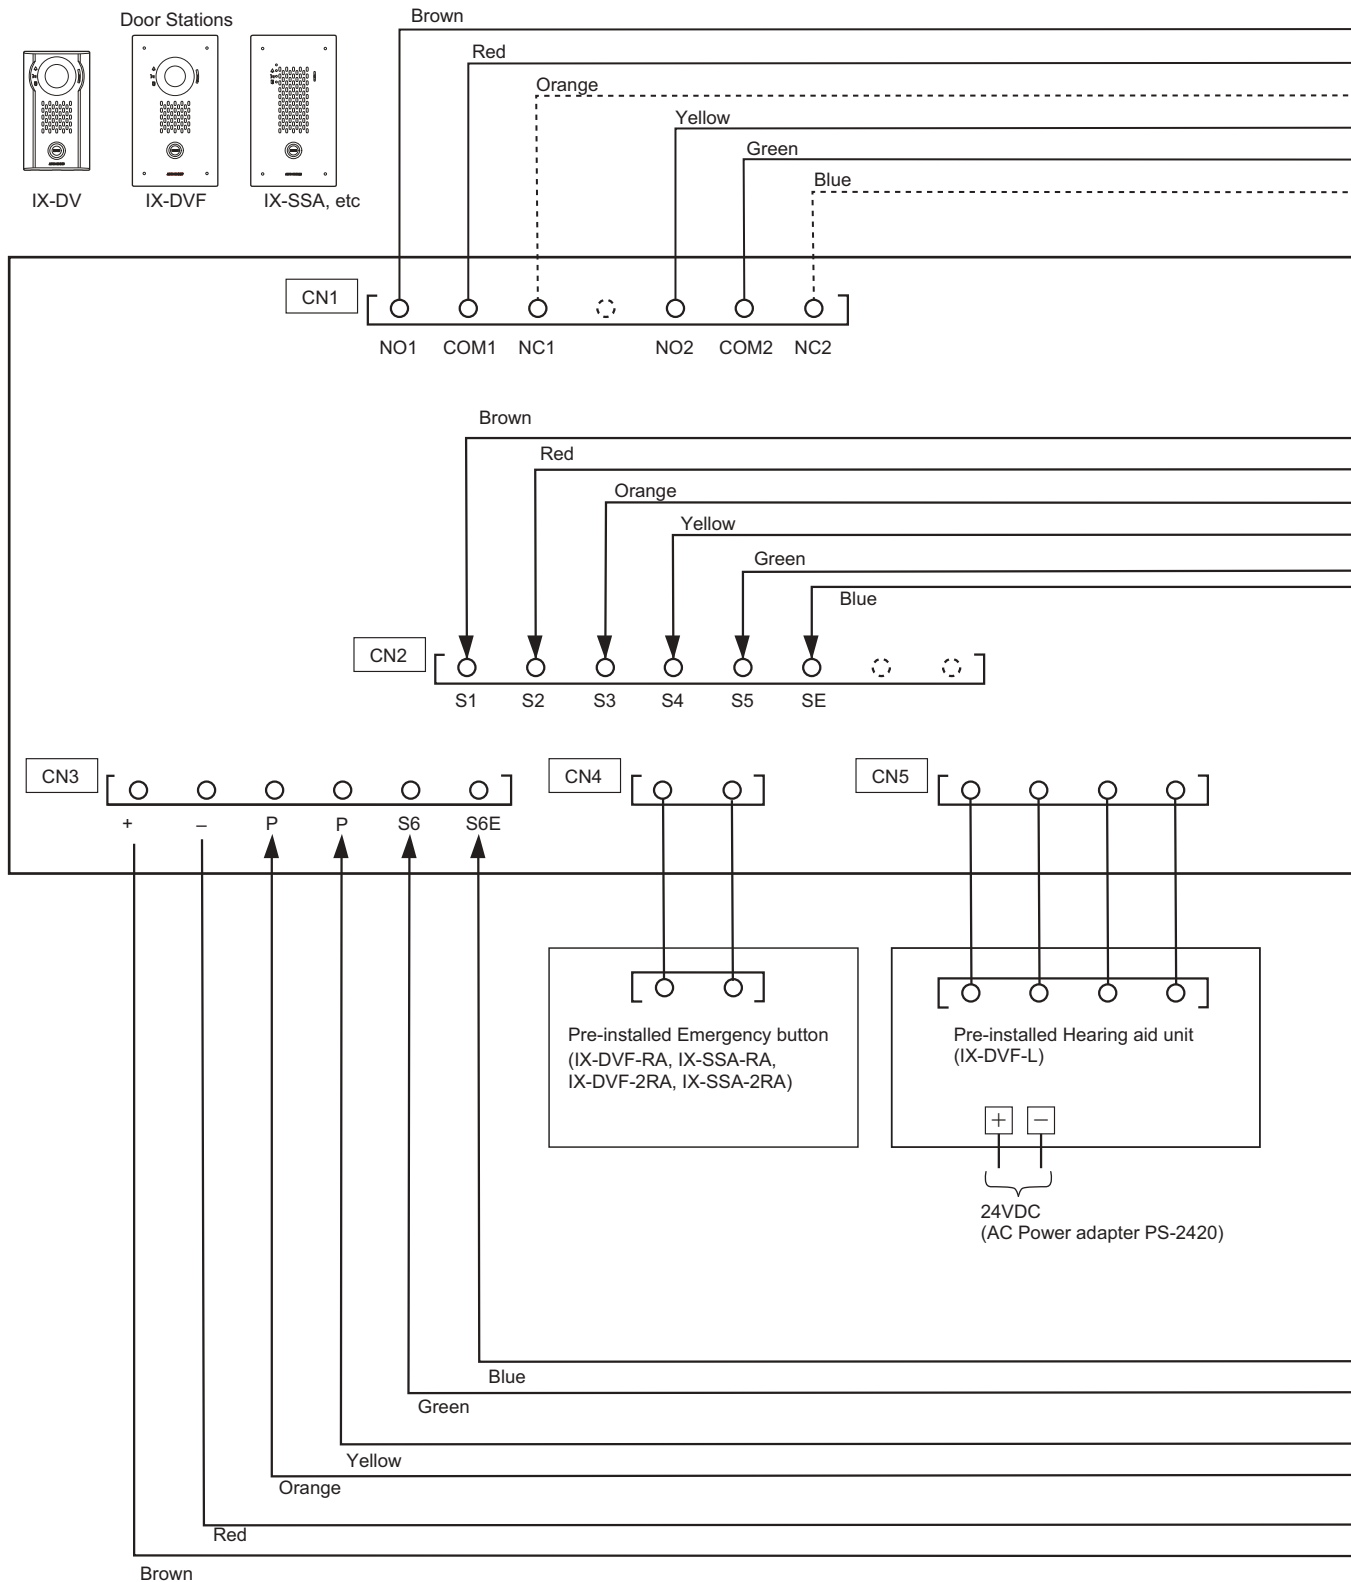

Simply twisting low-voltage lines together will create poor contact or will lead to oxidization of the surface of the low-voltage lines over long-term use, causing poor contact and resulting in the device malfunctioning or failure.

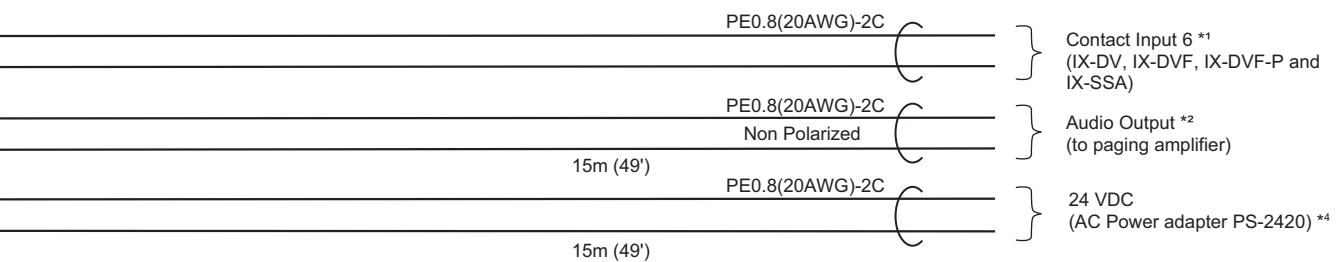

Wiring Connection

- Insulate and secure unused low-voltage lines and the connector-attached lead wire.

*1 Contact Input Specifications

Input method	Programmable dry contact (N/O or N/C)
	Level detection method
Detection time	100 msec or more
Contact resistance	Make: 700 Ω or less Break: 3 k Ω or more
Terminal short-circuit current	20 mA or less
Voltage between terminals	5 VDC or less (between open terminals)

*2 Audio Output Specifications

Output impedance	600 Ω
Output audio level	300 mVrms (with 600 Ω termination)

*3 Relay Output Specifications

Output method	Form C dry contact (N/O or N/C)
Contact rating	24 VAC, 1 A (resistive load) 24 VDC, 1 A (resistive load) Minimum overload (AC/DC): 100mV, 0.1mA

*4 The intercom unit can be powered by using a PoE switch or Aiphone PS-2420 power supply. In the case "PoE PSE" output of the intercom unit is used to power other devices, IEEE802.3at compatible PoE switch must be used to power the intercom unit.

In the case both a PoE switch and Aiphone PS-2420 power supply are used in combination to power the intercom unit, PS-2420 can provide back-up power if the PoE power supply fails. this allows continuous recording function etc. to continue operating.
