Enabling Master Station Option Inputs

An IX-MV7-* master station has four customizable contact inputs that can be used to trigger an outgoing call, answer an incoming call, trigger several types of pages, and other optional features. This guide will provide detailed instructions to configure the following: **Call, Answer Call/Page, Paging**, and **Message Page**. Some of these steps may refer to other documents providing information about **Group creation** and **uploading/settings chimes and sounds**.
