*1. Terminating switch should be set to A position on the last of the trunk line.
For all the stations connected to GT-4Z, all the terminating switches should be turned to A position.

*2. Input specifications

Input method	N/O (Normally Open) or N/C (Normally Closed) dry contact External sensor input (start signal only detection method)
Detection confirmation time	100m Sec or more
Contact resistance	During N/O dry closure: 1kΩ or less During N/C dry closure: 50kΩ or less
Terminal short current	1mA or less
Voltage between terminals	3.3V DC or less (when open between terminals)

If the output for transfer contact is polarized, connect with matching polarity.

*3. Power

【When Sub residential/tenant station is connected】

Even if only one Sub residential/tenant station is connected, one power adapter [PS24] can supply up to Room 2, provided that, for each room, wiring must be extended from the power adapter base.

【When Sub residential/tenant station is not connected】

One power adapter [PS24] can supply up to Room 4, provided that, for each room, wiring must be extended from the power adapter base.

*4. As for options, contact a person in charge.

■ RESTRICTIONS

- Smooth voice switching for auto voice actuation system may be hindered by talking voice strength or ambient noise, etc.
- Either of the following can be connected as Sub residential/tenant station:
Sub residential/tenant station GT-2H-L, GT-2H only.
- The mounting location should be more than 20cm (7-7/8") away from other electronic equipment, for example AC units, floor heating controller, wireless router or cordless telephone, etc.
- The mounting location should be more than 1m (3.3') away from radio or TV sets.
- During installation, if a zoom ⇔ wide range is set in the entrance station call picture settings, the number of recorded pictures may not switch between 3 zoom pictures ⇔ 3 wide pictures. The number of recorded entrance station pictures may not switch between 3 zoom pictures ⇔ 3 wide pictures.
- Handsfree communication with T-mode hearing aid is effective 20 (7-7/8") to 30cm (11-13/16") in front. The farther the distance, the smaller the level.
- Since the magnetic field of the coil of T-mode hearing aid is generated on the walls as well, it may be bugged by using a T-mode hearing aid in a condominium with thin walls.

■ RESTRICTIONS ON WIRING

- For wiring, it is recommended to use a single PVC jacketed cable with PE (polyethylene) insulation.
- The following cables cannot be used:
 - Individual conductors
 - Coaxial cable
 - Twisted pair cable
 - Cable with conductors in odd number
- Keep the intercom wires more than 30cm (12") away from AC power lines, as they may cause noise or other malfunctions. When using an existing cable run, the system may not work properly due to the type of the existing cables. In that case, it will be necessary to install new cables.
- Unused connector lead wire should be cut and insulated.
